Wayne Pneumothorax Set and Tray - Seldinger placement

Used for the relief of simple, spontaneous, iatrogenic, and tension pneumothorax.

Features and benefits

- Seldinger placement facilitates controlled, minimally invasive catheter introduction.
- The enlarged sideports are designed to facilitate the drainage of air.
- The radiopaque catheter material enhances x-ray visualization.
- The set includes a 5 cm long EchoTip® echogenic needle for ultrasound visualization and guidance.
- The catheter includes a pre-attached, three-way clear plastic stopcock.
- The set includes the Cook Chest Drain Valve, which is designed to help remove air from the pleural cavity.
- Pigtail catheters have a comparable efficacy to chest tubes in patients with pneumothorax.^{1,2}

Wayne Pneumothorax Set – Trocar placement

Used for the relief of simple, spontaneous, iatrogenic, and tension pneumothorax.

Features and benefits

- The needle obturator comes pre-assembled within the Wayne Pneumothorax Catheter to allow for trocar needle access to facilitate placement into the pleural cavity.
- The enlarged sideports are designed to facilitate the drainage of air.
- The radiopaque catheter material enhances x-ray visualization.
- The set includes the Cook Chest Drain Valve, which is designed to help remove air from the pleural cavity.
- The catheter includes a pre-attached, three-way clear plastic stopcock.
- Pigtail catheters have a comparable efficacy to chest tubes in patients with pneumothorax.^{1,2}

Cook® Emergency Pneumothorax Set - Catheter-over-needle placement

Used for emergency relief and temporary management of suspected tension pneumothorax.

Features and benefits

- Catheter-over-needle placement facilitates introduction of a small-bore drainage catheter into the pleural cavity.
- The set includes the Cook Chest Drain Valve, which is designed to help remove air from the pleural cavity.
- The set is supplied in a slip-peel pouch for transportation in emergency vehicles.

Pneumothorax Set and Tray - Trocar placement

Used for the relief of simple, spontaneous, or iatrogenic pneumothorax and tension pneumothorax.

Features and benefits

- The straight catheter is placed using the trocar needle obturator assembly.
- The set includes the Cook Chest Drain Valve, which is designed to help remove air from the pleural cavity.
- The radiopaque catheter material enhances x-ray visualization.

Thal-Quick Chest Tube Set - Seldinger placement

Used for the percutaneous introduction of a chest tube for pleural fluid drainage.

Features and benefits

- Seldinger placement facilitates controlled, minimally invasive catheter introduction.
- The chest tube is available in a variety of sizes to cater to different patient anatomies.
- The sideports are positioned on the distal end of the chest tube. The most proximal sideport is positioned on the radiopaque stripe to aid in confirming catheter positioning on x-ray.
- The set includes a 5 cm long EchoTip echogenic needle for ultrasound visualization and guidance.
- The clear polyvinylchloride catheter with a radiopaque stripe allows fluid to be seen during the drainage procedure.
- The 24 Fr double lumen set has an additional 17 gage lumen available for aspiration or infusion.

Fuhrman Pleural/Pneumopericardial Drainage Set – Seldinger placement

Used for evacuation of air from the pericardial sac or drainage of air or fluid from the pleural space.

Features and benefits

- Seldinger placement facilitates controlled, minimally invasive catheter introduction.
- The catheter is available in a variety of sizes, ranging from 5 to 12 Fr, to cater to different patient anatomies.
- Sideports are positioned within the catheter pigtail and are designed to aid in drainage.
- Centimeter markings on the pigtail catheter guide insertion.
- The catheter material has radiopaque properties.
- Pigtail catheters have been shown to have a comparable efficacy to chest tubes in patients with pneumothorax.^{1,2}

Simple Pneumothorax Aspiration Accessory Set

Used in conjunction with a pneumothorax aspiration catheter if incomplete expansion of the lung persists after mechanical aspiration of air.

Features and benefits

- The set includes a connecting tube and the latex-free Cook Chest Drain Valve, which is designed to remove air from the pleural cavity.
- The Cook Chest Drain Valve can be used for the transportation of patients who need to have pleural drainage catheters in place for long durations, or for outpatient procedures.
