Hercules[®]
3 STAGE BALLOON

Hercules[®]

3 STAGE BALLOON

Hercules balloons are strong because they're made of PET—a durable material that has the strength to stand up to a GI stricture.¹ With PET, Hercules balloons not only exert radial force on the stricture but also maintain their position during the dilation procedure.

The flexible atraumatic tip provides access through tight strictures.

The ability to visualize through the balloon permits a view of the dilation in progress.

Two radiopaque markers enhance the visibility of the balloon positioning.

The prelubricated balloon facilitates removal from the accessory channel.

Rapid balloon deflation is achieved with the express-evacuation catheter and rapid deflation sleeve.

The kink-resistant nitinol catheter provides maneuverability.

1. PET (polyethylene terephthalate) has a higher elastic modulus value than nylon and polyethylene. Engineering analysis D00295173. Data on file.

Clinical strength

Hercules balloons have the dilating strength to relieve your patient's stricture in the GI tract, including the esophagus, pylorus, duodenum, and colon, and may support longer-term luminal patency.

Rapid deflation²

Rapid deflation is achieved by simply applying negative pressure. Even if removal begins prior to complete deflation, the Hercules balloon can still be withdrawn into the endoscope.

The glow-in-the-dark size and inflation information on the packaging and catheter tags allows for easy identification.

Hercules® 3 Stage Balloon

Used to endoscopically dilate strictures of the esophagus.

Order Number	Reference Part Number	Catheter Fr	Catheter Length cm	Balloon Diameter mm	Balloon Fr	Balloon Length cm	Pressure atm	Pressure psi	Minimum Accessory Channel Diameter mm
G31928	HBD-8-9-10	7	180	8-9-10	24-27-30	8	4-6-8	60-90-120	2.8

Hercules® 3 Stage Wire Guided Balloon

Used to endoscopically dilate strictures of the gastrointestinal tract including the esophagus, pylorus, duodenum, and colon.

Order Number	Reference Part Number	Catheter Fr	Catheter Length cm	Balloon Diameter mm	Balloon Fr	Balloon Length cm	Pressure atm	Pressure psi	Minimum Accessory Channel Diameter mm
G51799	HBD-W-8-9-10	8	240	8-9-10	24-27-30	5.5	4-6-8	60-90-120	2.8
G51795	HBD-W-10-11-12	8	240	10-11-12	30-33-36	5.5	2-4-6	30-60-90	2.8
G51796	HBD-W-12-13.5-15	8	240	12-13.5-15	36-40.5-45	5.5	2-4-6	30-60-90	2.8
G51797	HBD-W-15-16.5-18	8	240	15-16.5-18	45-49.5-54	5.5	2-4-6	30-60-90	2.8

Wire guide length is 300 cm.

Cook Sphere® Inflation Device

Used to inflate the balloon with fluid, to monitor the pressure in the balloon during the procedure, and to deflate the balloon after dilation.

Order Number	Reference Part Number	Fluid Capacity mL	Maximum Pressure atm
G34903	CID-60-15	60	15

Some products or part numbers may not be available in all markets. Contact your local Cook representative or Customer Support and Distribution for details regarding stock or nonstock status (expect longer lead time if the product is nonstock), pricing, and availability.
