

Precise control all the way around.

With 360° rotation for secure retrievals

Caesar[®]

ALLIGATOR RAT TOOTH GRASPING FORCEPS

The 360° rotatable design enables precise positioning for endoscopic removal of tissue, stones, stents, or foreign bodies from the GI tract.

Caesar®

ALLIGATOR RAT TOOTH GRASPING FORCEPS

These rotating forceps are used in combination with an endoscope to remove tissue, stones, stents, or foreign bodies from the digestive tract.

- **360° 1:1 rotatable shaft** enables controlled, precise positioning during retrieval within the GI tract.
- **Integrated design** combines alligator grasping strength and rat-tooth jaw design to optimize grip strength and retrieve even difficult-to-grasp foreign objects.
- **Integrated, ergonomic handle design** allows flexible, comfortable operation and control.

Order Number	Reference Part Number	Catheter diameter mm	Working length cm	Long cups mm	Box Quantity
G61208	CARF-2.3-230	2.3	230	14.3	5

Some products or part numbers may not be available in all markets. Contact your local Cook representative or Customer Support & Distribution for details.

Cook offers a comprehensive line of tissue management solutions to help physicians target, acquire, and treat the specific tissue management needs of their patients.
