

Flexibility matters.

Target and acquire tissue with a needle designed to maximize flexibility and minimize puncture force.

EchoTip AcuCore™ EUS BIOPSY NEEDLE

Enhanced flexibility

The spring-coiled sheath—coated inside and out—is designed to maximize flexibility for accessing difficult anatomy^{1,2} and gives you exceptional control to advance the needle without adjusting your scope.³

Optimized puncture

The echogenic Franseen needle—made from a cobalt-chromium (CoCr) alloy to minimize deformation⁴—allows you to puncture tissue with minimum force^{3,5} to rapidly target lesions.

Controlled precision

The ergonomic, contoured handle facilitates needle control and stability, and the ReCoil® stylet's unique design allows you to easily manage the stylet during the procedure.

EchoTip AcuCore™

EUS BIOPSY NEEDLE

The **EchoTip AcuCore EUS Biopsy Needle** is used with an ultrasound endoscope for fine needle biopsy (FNB) of submucosal and extramural lesions, mediastinal masses, lymph nodes, and intraperitoneal masses within or adjacent to the gastrointestinal tract.

The needle is compatible with a range of endoscopes.²

It is supplied sterile and disposable. It is intended for single use only.

Order Number	Reference Part Number	Needle gage	Sheath Fr	Adjustable Needle Extension cm	Needle Tip Bevel	Minimum Accessory Channel Diameter mm
G59746	ECHO-BX-3-22	22	5.3	0-8	Franseen	2.8

Some products or part numbers may not be available in all markets. Contact your local Cook representative or Customer Support & Distribution for details.
