### ALLIGATOR RAT TOOTH GRASPING FORCEPS

These rotating forceps are used in combination with an endoscope to remove tissue, stones, stents, or foreign bodies from the digestive tract.

- **360° 1:1 rotatable shaft** enables controlled, precise positioning during retrieval within the GI tract.
- **Integrated design** combines alligator grasping strength and rat-tooth jaw design to optimize grip strength and retrieve even difficult-to-grasp foreign objects.
- **Integrated, ergonomic handle design** allows flexible, comfortable operation and control.

Order Number	Reference Part Number	Catheter Diameter mm	Working Length cm	Minimum Working Channel mm	Jaw opening Width mm	Quantity
G61208	CARF-2.3-230	2.3	230	2.8	14.3	5

Please follow any step-by-step instructions carefully, including the risk and technical information provided in the IFU. Note that some products or part numbers may not be available in all markets; consult your Cook representative for details.

Cook offers a comprehensive line of tissue management solutions to help physicians target, acquire, and treat the specific tissue management needs of their patients.
