

Indy OTW[®] Vascular Retriever

Intended use

- ▶ The Indy OTW Vascular Retriever is intended to snare a foreign body and withdraw it to a peripheral vascular location.
- ▶ Used for Iliac Branch Device, Fenestrated, Complex Aortic, and Foreign Body Retrieval procedures.
- ▶ Disposable product with a 3-year shelf life.
- ▶ For the full Instructions for Use, scan here:

Features and benefits

- ▶ **Over the wire (OTW)**
Compatible with 0.035 inch diameter wire guides

- ▶ **Four-loop configuration**
Interconnected nitinol loops

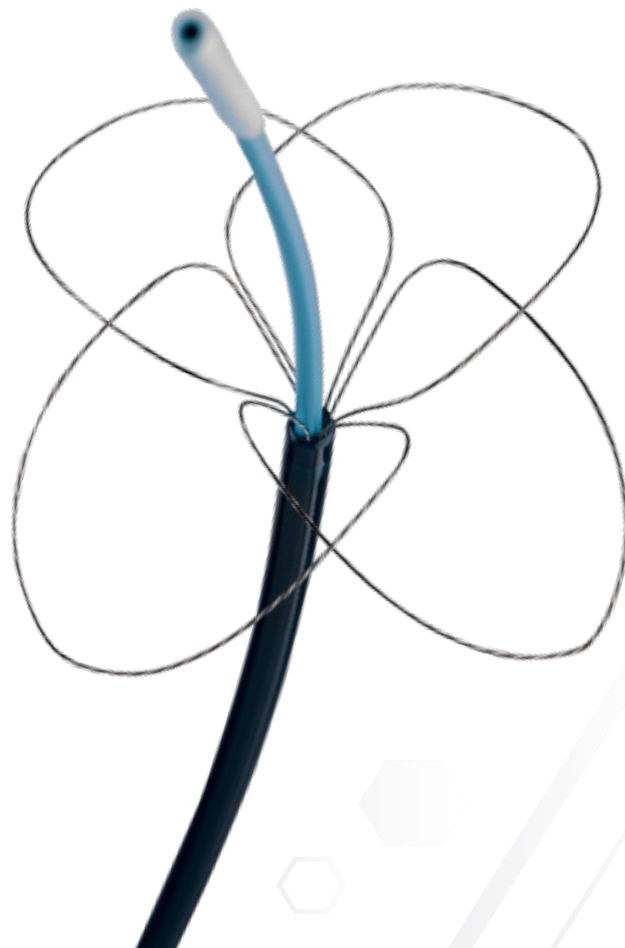

- ▶ **Platinum markers**
Added for radiopacity

- ▶ **Radiopaque band**
Highly visible

- ▶ **Flexor® sheath**
Kink-resistant technology

Features and benefits

- ▶ Its unique interconnected four-loop snare design with over-the-wire capability allows greater access to vessel coverage, reducing the need for device exchanges and saving you valuable time.

Other unique features include kink-resistant Flexor technology and visibility features throughout the entire device.

Clinical use examples include but are not limited to:

- ▶ Iliac Branch
- ▶ Thoracic Aortic Stent, Fenestrated Stent
- ▶ Foreign Body retrieval

Retrieve with ease

Four-loop expansion

- ▶ Up to 40 mm diameter expansion facilitates vessel coverage, ensuring a confident retrieval.

Kink-resistance

- ▶ Kink-resistant Flexor technology maximizes trackability across tortuous anatomy.

Nitinol loops

- ▶ Nitinol loops with platinum markers retain memory shape, delivering dependable performance and enhanced visibility, reducing the need for multiple device exchanges.

Cook is the only company to offer access, target, and treat devices in the aortic space.
