

Over the wire (OTW)

4-loop configuration

Platinum markers

Radiopaque band

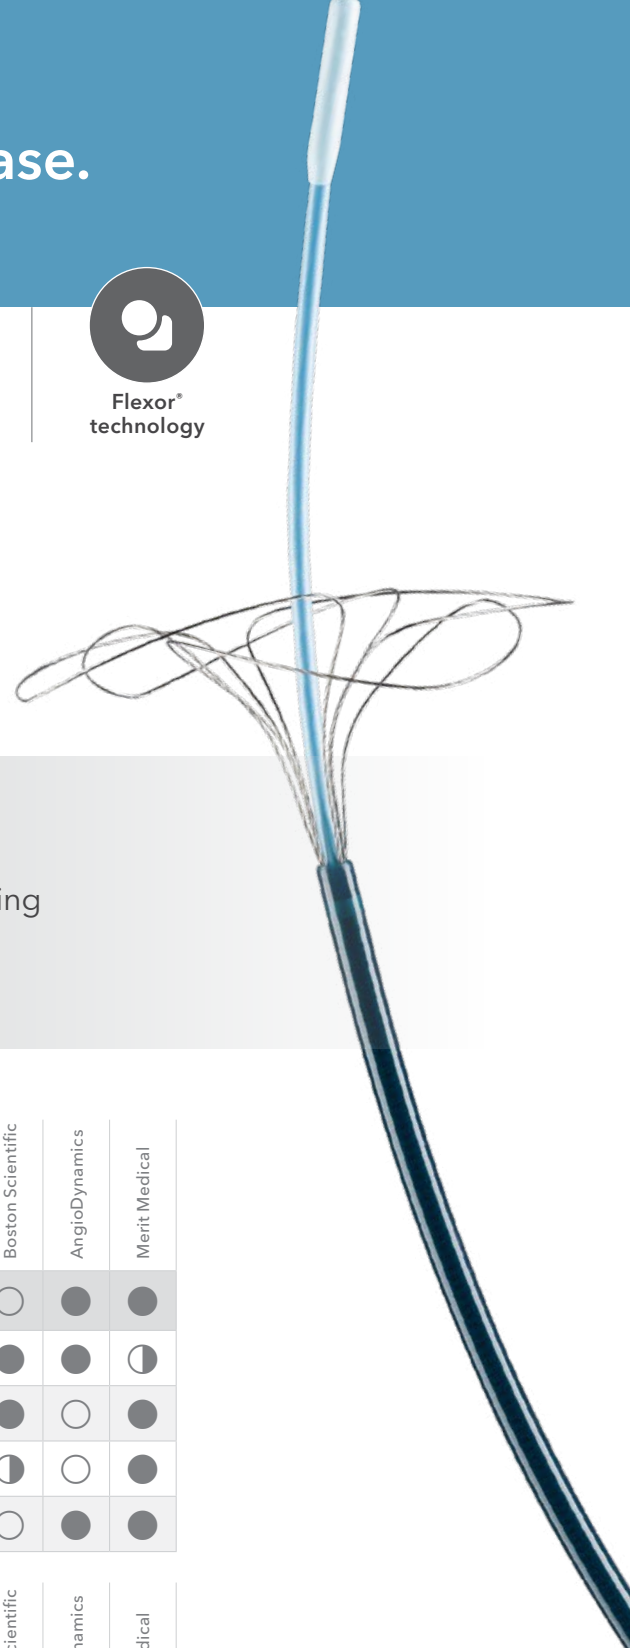

Flexor[®] technology

Cook Medical is the only company to offer a 4-loop snare in the market. **Indy OTW Vascular Retriever** provides a unique over-the-wire capability which allows greater access to vessel coverage, reducing the need for device exchange and saving you valuable time. Other unique features include kink-resistant Flexor[®] technology and visibility features throughout the entire device.

The Cook difference

Cook Medical has the industry's broadest line of vascular products. These products and others like them are expanding treatment options and improving patients' lives every day.

Proven products, advancing procedures, clinical partners.

Product description
 The Indy OTW Vascular Retriever consists of a 4-loop wire snare attached to an inner catheter (which is attached proximally to a metal cannula) and an outer Flexor sheath. The device is compatible with a 0.035 inch wire guide for over-the-wire introduction. The wire snare is composed of nitinol for shape memory, and platinum for visibility. The Flexor sheath has a radiopaque band incorporated within the sheath material to identify the location of the sheath's distal tip.
