

Doppler Blood Flow Monitor

Monitoring you can trust.

MANUFACTURER

[Cook Medical](#)

Since 1963, Cook Medical has worked with physicians to develop minimally invasive technologies. Today, Cook offers medical devices, biologic materials, and cellular therapies to deliver better patient outcomes more efficiently. We remain family owned so we can focus on what we care about most: patients, our employees, and our communities.

PRODUCT DESCRIPTION

The Doppler Blood Flow Monitor is designed to provide audible (primary) and visual (secondary) feedback of blood flow when connected to Cook-Swartz Doppler Probes and extension cables. Blood flow can be monitored continuously or periodically as required.

INTENDED USE

For monitoring blood flow in vessels intraoperatively and following reconstructive microvascular procedures, reimplantation, and free-flap transfers.
