

Perform genetic testing earlier in pregnancy.

COOK® CHORIONIC VILLUS SAMPLING SET

Chorionic villus sampling (CVS) helps to detect the presence or absence of genetic disorders at an earlier stage than amniocentesis. Cook Medical offers a Chorionic Villus Sampling Set to facilitate transcervical CVS.

COOK® CHORIONIC VILLUS SAMPLING SET

The Cook® Chorionic Villus Sampling Set is indicated for use in obtaining chorionic tissue samples transcervically for the purpose of prenatal diagnosis of genetic abnormalities during weeks 10-12 of pregnancy.

- The set consists of a nonradiopaque polyethylene catheter and a malleable stainless steel stylet.
- The ergonomic handle allows for greater maneuverability.
- The stylet's EchoTip® echogenic tip increases visibility under ultrasound.
- The catheter is flexible to minimize trauma to the surrounding tissue.

Order Number	Reference Part Number	Catheter Fr	Catheter Length cm	Stylet Length cm
G19027	J-CVS-532400	5.3	24	25.5
G16908	J-CVS-572700	5.7	27	28.5
