

Nest VT™ Vitrification Device

Secure. Stable. Simple.

A gloved hand in a dark, textured glove holds a purple pipette. The pipette is angled downwards towards a petri dish containing a white, fibrous substance. The background is dark, and the lighting highlights the pipette and the white substance. The overall scene is clinical and focused on the laboratory procedure.

NEST VT VITRIFICATION DEVICE

A secure solution for embryos and oocytes during vitrification

Securing embryos and oocytes during vitrification begins with you.

The Nest VT Vitrification Device is designed to ease and simplify the process of securing embryos and oocytes during vitrification. With a robust design, including its hallmark “nest” for holding specimens, the Nest VT Vitrification Device helps secure embryos and oocytes for cryo-storage and relocation.

Nest VT™

VITRIFICATION DEVICE

Security

- **Recessed “nest” design:** The unique concaved nest for embryos and oocytes helps minimize disturbance to specimens during capping.
- **The confidence of security:** The cap’s friction fit provides tactile feedback so you know specimens are secure inside. The ergonomic, triangular design provides additional stability during the procedure.

Stability

- **Material integrity:** The device material performs consistently under extreme temperature fluctuations.
- **Purposeful packaging:** The packaging tray keeps the cap and stick separated and protects the device tip from damage during shipping.

Simplicity

- **Ease of use:** The triangular design provides a stable base and improves device manipulation. A recessed indentation on the cap creates a defined area for forceps, enabling a secure grip during use and capping.
- **Color codes:** Five distinct device colors let you organize and identify specimens the way you prefer.
- **Labeling feature:** The textured and recessed surface area can be used for labeling specimens.

Ordering information

| Order Number | Reference Part Number |
|--------------|-----------------------|
| G58733 | K-NEST-YELLOW |
| G58734 | K-NEST-BLUE |
| G58735 | K-NEST-RED |
| G58736 | K-NEST-GREEN |
| G58737 | K-NEST-PURPLE |

Some products or part numbers may not be available in all markets. Contact your local Cook representative or Customer Support & Distribution for details.
